

COVID-19: HEALTH & SAFETY PROCEDURES

In order to ensure the health and safety of passengers and crew throughout the cruising experience, St. Lawrence Cruise Lines has instituted a number of safety procedures designed to protect against the spread of Covid-19. These procedures have been thoughtfully developed in accordance with federal and regional health and safety guidelines. These procedures may change according to the evolving state of the pandemic and current government initiatives to slow or stop Covid-19.

If you have any questions about the current status of our Health & Safety Procedures, please contact our Reservations Staff at 1-800-267-7868.

Passenger Screening (Pre-Cruise)	All passengers will be required to provide proof of double vaccination and must be willing to receive a Covid-19 AG rapid test on the dock before boarding the vessel. St. Lawrence Cruise Lines recommends that all travellers undergo an additional test (NAAT/PCR or Antigen) 72 hours before travelling in order to ensure a safe and healthy cruise. All crew members will be vaccinated, assessed, and tested prior to boarding.
Passenger Monitoring (Cruising)	The well-being of all passengers and crew will be monitored throughout the cruise. Passengers are urged to alert our cruise director if they experience flu-like symptoms.
Air Purification System	St. Lawrence Cruise Lines will employ high quality HEPA air purifiers in the Grand Saloon, which serves as the observation room during the day the dining room during meal times, and the lounge during evening entertainment.
Transportation and Shore Tours	All shore tours and transportation to and from attractions have been vetted and approved by the Cruise Line in order to ensure that they meet provincial and federal health and safety guidelines.
Masks/Face Coverings	Masks will be required in shared public areas of the vessel, except for the outer decks when there is sufficient airflow and physical distance. This includes transit through the companionways of the vessel. Masks are not required in the dining room during meals or in the privacy of staterooms.
Physical Distancing	Passengers are encouraged to maintain a 6' distance from fellow travellers who are not in their social bubble. The Grand Saloon (dining room) has been laid out to accommodate physical distancing with controlled access during meal times.
Hand Sanitation Stations	Hand sanitation stations have been placed throughout the ship for passengers, as well as in common crew areas.
Shore Tour Sanitization	Shore tours will be conducted separate from the public, and travellers will be encouraged to practice physical distancing during tours when possible. Hand sanitation will be facilitated before and after visiting attractions.
Surface Disinfectant	A surface disinfectant regime will be used for all high touch surfaces with cleaning products that have been federally recommended to protect against Covid-19
Clorox 360 Electrostatic Disinfectant Program	Our hospital-grade electrostatic cleaning system has been endorsed by Health Canada and will be used to disinfect all luggage and staterooms prior to boarding, as well as for the daily sanitization of all common interior areas.
